DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Several frame buildings, including a two-story L-shaped farmhouse, a small auxiliary house, a garage and a bank barn, make up this farm. The inner crook of the dwelling's ell includes a diagonal entrance. Either section of the house measures three bays long by one bay deep. A porch shelters the south and east sides, which together form the facade.

The slate roof includes several rows of scalloped shingles. Asbestos shingles sheath the walls. A brick chimney heats the center of either section of the house. A cut stone block foundation underpins the building. A cellar entrance appears at the east end. 2/2 windows light the house. A modern shed-roofed addition covers the north side.

The auxiliary house stands about 20 feet north of the main dwelling. The true 1½ story building presents two bays on each elevation. A porch shelters the east facade. Entrances appear on the south and east elevations. 6/6 windows light the German-sided building. An exterior brick stove-flue chimney appears at the west end.
